ENGINEERING AND TECHNOLOGY DEGREES
1982

PART I—BY SCHOOL

Summary Data by School, Curriculum Group and Degree Level

ENGINEERING MANPOWER COMMISSION

A Commission of the Engineering Affairs Council
of the
American Association of Engineering Societies, Inc.

© 1982 by the American Association of Engineering Societies, Inc

ISBN 0-87615-134-9

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of 43 organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1982 OFFICERS

Irvan F. Mendenhall *Chairman*	Robert M. Saunders *Chairman-Elect*
Nicholas J. Radell *Secretary/Treasurer*	H. Arthur Nedom *Past-Chairman*
Eugene Zwoyer *President*	

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1982 OFFICERS

James F. Shivler, Jr. *Chairman*	William E. Carew *Vice-Chairman*
Donald G. Weinert *Secretary/Treasurer*	

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> *"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."*

1982
EMC OFFICERS

Paul Doigan
Chairman

Luke H. Noggle
Chairman, Surveys Committee

Dorothy Morris
Vice-Chairman

Paul B. Wood
Vice-Chairman

Donald Schroeter
Chairman, Degree Survey

MANPOWER ACTIVITIES STAFF

Patrick J. Sheridan
Director

Judith A. McCormick
Manager

Carolyn J. Heydt
Manpower Statistician

Joyce A. Kostrinsky
Staff Assistant

ACKNOWLEDGEMENTS

This survey was conducted, and report prepared and edited by, Judith McCormick and Carolyn J. Heydt, under the general supervision of Patrick J. Sheridan, Director, Manpower Activities. Donald G. Schroeter, Chairman of the Degree Survey Sub-Committee of EMC, provided guidance and direction for this year's survey.

At this time, the Engineering Manpower Commission would like to express its gratitude to Mark Swankoski and associates at E.I. duPont de Nemours & Co., for their invaluable assistance in processing the degree survey data in previous years. EMC has obtained in-house data processing capabilities for this survey, and the 1982 data are the first to be processed in this manner.

Industrial Technology Degrees by Curriculum and Level -- 1981-82 65

INTRODUCTION

Following the format established in 1976, this report on engineering and technology degrees awarded in 1982 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I consists of degree data for each school arranged in tabular form with columns for prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology, and four in industrial technology. At the end of each table are summaries of the number of students in special categories, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), women, and foreign nationals included in the totals for each degree level.

Part II contains detailed data broken down by school for each of the six special categories of students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology.

Part III focuses on curricula in greater detail than the other parts. Each of the different engineering and technology curriculum groups is listed in alphabetical order, giving the schools offering such programs and the exact program titles assigned by the schools, number of degrees awarded at each degree level, and the numbers of students from special categories. The Accreditation Board for Engineering and Technology (ABET) accreditation for specific curricula is designated for each curriculum. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles.

For the convenience of users, these parts of Engineering and Technology Degrees-1982 are available separately or as a set. A separate report on Engineering and Technology Enrollments for 1982 is scheduled to be off the press during February, 1983. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

EXPLANATION OF PART I

This part of the report provides data on the number of engineering and technology degrees granted, for the school year ending June, 1982. Tables appear for the following degree levels:

- Engineering Degrees
  - Bachelor's
  - Master's
  - Engineer (Professional)
  - Doctor's

- Engineering Technology Degrees
  - Certificate
  - Associate
  - Bachelor's
  - Master's

- Industrial Technology Degrees
  - Certificate
  - Associate
  - Bachelor's
  - Master's

The engineering tables include data from schools known by the EMC to offer engineering degrees at at least the bachelor's level. The data are essentially complete for all engineering schools in the United States. Data are presented according to major curriculum categories.

The engineering technology and industrial technology tables show data for selected schools, including all schools on the ABET accreditation lists for 1981. Data are again presented by major categories.

Unlike the totals for engineering degrees, the technology degree totals do not represent national totals because they include only selected schools responding to the survey. There is no way of knowing how many additional degrees may have been awarded by other schools. The 1982 technology degree data are not directly comparable to previous years' data because of variations in the schools responding each year.

Following the totals for each degree level, data for the six special categories of students are summarized for the curriculum categories. Complete data supporting this summary information are provided in Part II; Part III gives more detailed information by curriculum, grouped under major categories.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1 - School. Schools are listed alphabetically by state, followed by a total for that state.

Column 2 - Accreditation and Control (AC). The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1981 list). Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1981 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission (1980-81 list).
5 = Accredited by NATTS (1980-81 list).
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public - state or local government control
2 = Public - federal government control
3 = Private - non-profit, non-sectarian
4 = Private - religious
5 = Private - proprietary

The remaining columns give the number of degrees awarded by each school by major curriculum group, as follows:

Engineering Degree Categories

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing
MAR	Marine & related
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials, Metallurgical, Welding
NUC	Nuclear
PET	Petroleum
OTH	Other
SYS	Systems, Operations

Engineering Technology and Industrial Technology Degree Categories

ACN	Air Conditioning
AER	Aeronautical & related
ARC	Architectural
AUT	Automotive
CHE	Chemical
CIV	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design, Graphics
ELE	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GEN	General Technology
INT	Industrial & Manufacturing
MAR	Marine & related
MCH	Mechanical
MNP	Mining, Metallurgical, Welding
MTR	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Environmental, Agricultural, Bioengineering

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1981 report has been substituted for these institutions:

Tuskegee Institute
San Francisco State University
University of Santa Clara
Midwest College of Engineering
University of New Orleans
University of Maine-Orono
University of Missouri-Kansas City
Fairleigh Dickinson
University of Tennessee-Chattanooga
Prairie View A & M College

Information was not received from the following ABET-accredited engineering technology schools at the time of publication. Information from the 1981 report has been substituted for these institutions:

City College of San Francisco
Fort Valley State College
Indiana State University, Evansville
Eastern Maine Vocational-Technical Institute
New York Institute of Technology-NYC
SUNY A & T - Morrisville
Sumter Area Technical College
Tri-Cities State Technical Institute

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> *"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."*

Staff Assistant

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of 43 organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1982 OFFICERS

Irvan F. Mendenhall *Chairman*	Robert M. Saunders *Chairman-Elect*
Nicholas J. Radell *Secretary/Treasurer*	H. Arthur Nedom *Past-Chairman*
Eugene Zwoyer *President*	

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1982 OFFICERS

James F. Shivler, Jr. *Chairman*	William E. Carew *Vice-Chairman*
Donald G. Weinert *Secretary/Treasurer*	

ACKNOWLEDGEMENTS

This survey was conducted, and report prepared and edited by, Judith McCormick and Carolyn J. Heydt, under the general supervision of Patrick J. Sheridan, Director, Manpower Activities. Donald G. Schroeter, Chairman of the Degree Survey Sub-Committee of EMC, provided guidance and direction for this year's survey.

At this time, the Engineering Manpower Commission would like to express its gratitude to Mark Swankoski and associates at E.I. duPont de Nemours & Co., for their invaluable assistance in processing the degree survey data in previous years. EMC has obtained in-house data processing capabilities for this survey, and the 1982 data are the first to be processed in this manner.

INTRODUCTION

Following the format established in 1976, this report on engineering and technology degrees awarded in 1982 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I consists of degree data for each school arranged in tabular form with columns for prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology, and four in industrial technology. At the end of each table are summaries of the number of students in special categories, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), women, and foreign nationals included in the totals for each degree level.

Part II contains detailed data broken down by school for each of the six special categories of students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology.

Part III focuses on curricula in greater detail than the other parts. Each of the different engineering and technology curriculum groups is listed in alphabetical order, giving the schools offering such programs and the exact program titles assigned by the schools, number of degrees awarded at each degree level, and the numbers of students from special categories. The Accreditation Board for Engineering and Technology (ABET) accreditation for specific curricula is designated for each curriculum. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles.

For the convenience of users, these parts of Engineering and Technology Degrees-1982 are available separately or as a set. A separate report on Engineering and Technology Enrollments for 1982 is scheduled to be off the press during February, 1983. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

EXPLANATION OF PART II

Following the same format as in Part I, this part of the report gives details of data on engineering and technology degrees received by members of the six special categories of students.

Tables appear for each of the following six special categories of students: the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), women and foreign nationals, for the following degree levels:

- Engineering Degrees
  - Bachelor's
  - Master's
  - Engineer (Professional)
  - Doctor's
- Engineering Technology Degrees
  - Certificate
  - Associate
  - Bachelor's
- Industrial Technology Degrees
  - Certificate
  - Associate
  - Bachelor's
  - Master's

The engineering tables include data from schools known by the EMC to offer engineering degrees at at least the bachelor's level. The data are essentially complete for all engineering schools in the U.S. Data are presented according to major curriculum categories.

The engineering technology and industrial technology tables show data for selected schools, including all schools on the ABET accreditation lists for 1981. Data are again presented by major categories.

Unlike the totals for engineering degrees, the technology degree totals do not represent national totals because they include only selected schools responding to the survey. There is no way of knowing how many additional degrees may have been awarded by other schools. The 1982 technology degree data are not directly comparable to previous years' data because of variations in the schools responding each year.

Complete data for all students combined are provided in Part I containing summary data by school, curriculum group and degree level; Part III gives more detailed data by curriculum, grouped under major categories.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1 - School. Schools are listed alphabetically by state, followed by a total for that state.

Column 2 - Accreditation and Control (AC). The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1981 list). Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1981 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission (1980-81 list).
5 = Accredited by NATTS (1980-81 list).
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public - state or local government control
2 = Public - federal government control
3 = Private - non-profit, non-sectarian
4 = Private - religious
5 = Private - proprietary

The remaining columns give the number of degrees awarded by each school by major curriculum group, as follows:

Engineering Degree Categories

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing
MAR	Marine & related
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials, Metallurgical, Welding
NUC	Nuclear
PET	Petroleum
OTH	Other
SYS	Systems, Operations

Engineering Technology and Industrial Technology Degree Categories

ACN	Air Conditioning
AER	Aeronautical & related
ARC	Architectural
AUT	Automotive
CHE	Chemical
CIV	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design, Graphics
ELE	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GEN	General Technology
INT	Industrial & Manufacturing
MAR	Marine & related
MCH	Mechanical
MNP	Mining, Metallurgical, Welding
MTR	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Environmental, Agricultural, Bioengineering

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1981 report has been substituted for these institutions:

Tuskegee Institute
San Francisco State University
University of Santa Clara
Midwest College of Engineering
University of New Orleans
University of Maine-Orono
University of Missouri-Kansas City
Fairleigh Dickinson
University of Tennessee-Chattanooga
Prairie View A & M College

Information was not received from the following ABET-accredited engineering technology schools at the time of publication. Information from the 1981 report has been substituted for these institutions:

City College of San Francisco
Fort Valley State College
Indiana State University, Evansville
Eastern Maine Vocational-Technical Institute
New York Institute of Technology-NYC
SUNY A & T - Morrisville
Sumter Area Technical College
Tri-Cities State Technical Institute

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of 43 organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1982 OFFICERS

Irvan F. Mendenhall
Chairman

Nicholas J. Radell
Secretary/Treasurer

Eugene Zwoyer
President

Robert M. Saunders
Chairman-Elect

H. Arthur Nedom
Past-Chairman

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1982 OFFICERS

James F. Shivler, Jr.

Donald G. Weinert
Secretary/Treasurer

William E. Carew
Vice-Chairman

THE ENGINEERING MANPOWER COMMISSION
# of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> *"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."*

ACKNOWLEDGEMENTS

This survey was conducted, and report prepared and edited by, Judith McCormick and Carolyn J. Heydt, under the general supervision of Patrick J. Sheridan, Director, Manpower Activities. Donald G. Schroeter, Chairman of the Degree Survey Sub-Committee of EMC, provided guidance and direction for this year's survey.

At this time, the Engineering Manpower Commission would like to express its gratitude to Mark Swankoski and associates at E.I. duPont de Nemours & Co., for their invaluable assistance in processing the degree survey data in previous years. EMC has obtained in-house data processing capabilities for this survey, and the 1982 data are the first to be processed in this manner.

Engineering Curricula by School--1981-82.................. 3

Technology Curricula by School--1981-82................... 51

Engineering, Engineering Technology and
Industrial Technology Curricula by Degree................ 91

INTRODUCTION

Following the format established in 1976, this report on engineering and technology degrees awarded in 1982 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I consists of degree data for each school arranged in tabular form with columns for prominent curriculum groups, totals for the school, and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology, and four in industrial technology. At the end of each table are summaries of the number of students in special categories, i.e., the four minority groups (Black, Hispanic, American Indian, and Asian/Pacific), women, and foreign nationals included in the totals for each degree level.

Part II contains detailed data broken down by school for each of the six special categories of students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology.

Part III focuses on curricula in greater detail than the other parts. Each of the different engineering and technology curriculum groups is listed in alphabetical order, giving the schools offering such programs and the exact program titles assigned by the schools, number of degrees awarded at each degree level, and the numbers of students from special categories. The Accreditation Board for Engineering and Technology (ABET) accreditation for specific curricula is designated for each curriculum. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles.

For the convenience of users, these parts of Engineering and Technology Degrees-1982 are available separately or as a set. A separate report on Engineering and Technology Enrollments for 1982 is scheduled to be off the press during February, 1983. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

PART III

This part of the report presents the 1982 degree data grouped under more detailed curricula headings than Parts I and II. Taking each of the different curricula in turn, the tables list all schools reporting degrees in that field, the number of degrees awarded at each level, and the number received by the six special categories of students.

Again, this year the curricula titles include the exact title provided by each school. This allows for specific or specialized reporting of programs. The tables also indicate those curricula that are accredited by the Accreditation Board for Engineering and Technology (ABET) according to the following codes:

B = accredited at bachelor's degree level
M = accredited at master's degree level
A = accredited at associate degree level
